

SPIRE

Post date:

21/12/2020 - 18:10

Angels Orduna Cao, A.SPIRE Executive Director, took part in the 2nd Biotech HUB-Meeting of ERA-Nets and European Instruments related to **Biotechnology and Innovative Technologies**. It was organised by Saxon State Ministry for Science, Culture and Tourism (SMWK) on 10-11 November 2020. She intervened in the Panel "**Partnerships under Horizon Europe**" and presented the forthcoming Processes4Planet Partnership. It will be building on the SPIRE outcomes and results. Our unique cross-sectorial 2050 Roadmap is aligned with the European Green Deal and Processes4Planet will be crucial to contribute **mobilizing industry for a clean and circular economy**.

A similar message, but with a focus on the benefits this Partnership can bring to Luxembourg, was presented at **Luxembourg Smart Manufacturing week on November 16th**. As per headquarters A.SPIRE is represented in more than 20 countries, with plants from our companies in all the EU-27 countries.

As we keep on growing, we are eager to have more **regional representatives, clusters, hubs, civil society** and to collaborate even more closely with Member States.
