

## Projects

Post date:

14/02/2020 - 15:19

COCOP and FUDIPO are holding their final workshop on Digitized operations for sustainable process industries on March 11th 2020 at TU Dortmund University in Germany. The objective of the workshop is to present the EU perspective on digital operations in process industries and discuss about plant-wide monitoring & control of data-intensive processes. COCOP and FUDIPO will present their vision, objectives, approach and the solutions implemented for different process industry (Steel, Copper, Pulp & Paper, Oil Refining, Heat and Power plants and Waste-Water treatment), evaluating their impact on quality and resources/energy efficiency and analysing their transferability to other sectors.

Attendance at the workshop is free but the numbers are limited. Please, register before 14th February. Registration is available on-line here.
