DG GROW is organizing the "Key Enabling Technologies & Digital Transformation projects under the Investment Plan" workshop that will take place on the 10th of December in Brussels.

Since the global economic and financial crisis, Europe has been suffering from low levels of investment. Collective and coordinated efforts at European level are needed to reverse this downward trend and put the EU on the path of economic recovery. The €315 billion worth European Investment Plan is an important tool to speed up the economic growth and job creation in Europe.

The European Fund for Strategic Investment (EFSI) has a huge potential to contribute to the modernisation of the European industry but its success depends on the industrial participation.

The uptake of advanced digital technologies and Key Enabling Technologies (KETs) by industrial and service sectors is crucial for the future competitiveness of the EU.

This workshop is aimed at private as well as public stakeholders involved in KETs and digital

transformation and will be an occasion to get a better understanding about practical ways and tools to participate in the Investment Plan. Interested participants will also have a possibility for a bilateral meeting with the EIB experts (please flag your interest during the registration process).

Where: Auditorium, Breydel Building, Avenue d'Auderghem 45, Brussels

When: 10Th December 2015, 11:45-17:00
