The European Commission has just launch a Public consultation on the 2030 Climate Target Plan and Roadmaps are open for feedback from 18th March 2020 to the 15 April 2020.

The proposition support a cut in greenhouse gas emissions of at least 50% to 55% for 2030 from 1990 levels, rather than at least 40% and to asset the economic, social and environmental impacts and possible policy measures.

A.SPIRE is delighted to share its feedback on the subject and invites its members to participate.
