The SEEBRIDGE project - Building Resilience In Social Economy SMEs for Greener & Digital Production Towards the Goal of a Climate-Neutral Economy (LinkedIn) aims to enhance the skills

and competencies of SMEs operating in the process industry while facilitating their twin transition, through a series of peer learning activities, webinars, and training sessions tailored to benefit both SMEs and intermediary organisations. Webinars will be organised to understand the EU Carbon Border Adjustment Mechanism (CBAM), as well as The Twin Green & Digital Transition in the context of energy-intensive industries.

For a better understanding of the landscape, the SEEBRIDGE project is gathering insights, to ensure that the content of the planned activities is precisely aligned with their needs and expectations.

Are you a public authority, sectoral organisation, municipality, or business support organisation? The project team invites you to take part in **this questionnaire**.

Your name and contact information will remain anonymous and will not be reported in further related reports. Your feedback is crucial in guiding the design of the training, consultancy, and advisory sessions. Thank you for supporting this exciting project in reshaping the SME landscape.
