

## SPIRE

Post date:

16/10/2020 - 16:07

The **SPIRE 2019 Projects' Brochure** has been published and it's a key document introducing 2019 projects selected and commissioned by SPIRE under the European Commission's Horizon 2020 programme.

SPIRE projects aim at developing technologies and value-chain solutions to **transform the EU Process Industry and create long-term sustainability for Europe** through cross-sectorial technological and non-technological innovation efforts.

In 2019, **20 new SPIRE projects were launched** with the aim to achieve three key objectives:

- Developing and deploying climate-neutral solutions;
- Closing the energy and feedstock loops;
- Achieving global leadership in climate-neutral and circular solutions, accelerating innovation and

unlocking public and private investment to boost competitiveness.

We are delighted to give you an overview of their initiative. Read about the SPIRE 2019 Projects' Brochure.
