The second edition of **Sustainable Economy in Horizon Europe. International matchmaking and networking** (INSE) will take place in Warsaw on October 25-26, 2023 at Warsaw Plaza Hotel (??czyny 5 Street, Warsaw, Poland).

Registration is open: <https://inse-2023.b2match.io/> The number of places is limited.

This event is a unique opportunity to establish direct contacts between scientists/researchers and entrepreneurs. The event's formula is based on:

- Pitching sessions – presentations of project ideas related to the theme of the event,
- Networking sessions – building relationships and networks of industry contacts (including direct meetings with speakers of pitching sessions),
- Matchmaking sessions – identifying and connecting partners with common project interests (also through an application that allows arranging direct contact during the event).

The event is focused on areas related to sustainable economy and clean energy, in particular on:

- critical raw materials and ensuring the supply chain for raw materials,
- processing, recycling of waste,
- circular economy,
- advanced materials and technologies,
- the use of hydrogen as a raw material in innovative production processes,
- developing efficient technologies for capturing and purifying CO/CO₂ as a product of industrial processes.

More information about the event is available on the event website.

The agenda is available [here](#).
