WssTP will dedicate the 2nd edition of Water Innovation Europe 2014, on June 25-26, to the theme ‘**Water : Green tape or blue gold ?**’. Through a unique 2-day conference, WssTP aspires to bring the economic potential for an innovative sustainable water sector in Europe to the foreground and discuss what kind of legal, technical and political bottlenecks stand in the way of the European water sector to achieve its economic potential.

Water Innovation Europe 2014 is a major opportunity for people from across the water sector to meet, debate and contribute to shaping the mind-set of the new European Parliament and the new European Commission with regard to the opportunities for the European water sector, as well as the Work Programme 2016-2017 for Horizon2020 along the lines of the Green economy concept.

In the context of Water Innovation Europe 2014, WssTP will also take the opportunity to celebrate its 10th anniversary, by hosting IWA PIA Awards and WssTP SME awards!
