**EMB3Rs**

Full Title:  Reusing excess Heat/Cold in a profitable way

Aim:

EMB3Rs aim to develop an excess HC (Heat/Cold) (re)use matching platform for industry and end users.

Concept:
The EMB3Rs platform will allow users to determine the costs and benefits related to excess HC utilisation routes and help establishing conditions for implementing the most promising solutions. It offers industrial users and other stakeholders an intuitive self-use tool for assessing the feasibility of new technology and exploring business scenarios benefiting each individual producer or consumer in a given industrial community which delivers win-win solutions between different industries.
