

AI CUBE

DT-SPIRE-11-2020

macroapplication process areas (e.g., R&D management and planning, process control, supply chain management, predictive maintenance, and product customization). The 'Cube Concept' allows to set the stage for the development and integration of four key sets of results: - A novel AI and BD Maturity Level Assessment framework to support companies in evaluating the level of implementation of technologies. - The CUBE, to be used as mapping tool by industries to assess their state of advancement in the penetration of digital technologies in the sector. - A set of inspirational AI and BD Business Cases and an AI-CUBE Business Model Game. - A set of eight sectoral roadmaps including easy to consult Infographics.
