EPOS

Full Title: Enhanced energy and resource Efficiency and Performance in process industry Operations via onsite and cross-sectorial Symbiosis

Aim:

The EPOS project brings together 5 global process industries from 5 key relevant sectors: steel, cement, chemicals, minerals and engineering. EPOS's main objective is to enable cross-sectorial Industrial Symbiosis and provide a wide range of technological and organisational options for making business and operations more efficient, more cost-effective, more competitive and more sustainable across process sectors.

Concept:
The ambition of the EPOS partners is to gain cross-sectorial knowledge and investigate cluster opportunities using an innovative Industrial Symbiosis platform to be developed and validated during the project.

Start date:
01/10/2015

End date:
30/09/2019
