

Why A.SPIRE?

Being an A.SPIRE member means being at the centre of European Process Industry innovation: shaping R&I priorities, accessing funding, and driving the transformation of Process Industries and their value chains towards a net-zero and circular future and Europe's strategic autonomy. We are the association representing the Process Industries in Europe, managing and implementing the only Process Industry-led Horizon Europe Partnership.

Our members are the companies, researchers, and organisations already driving that transformation, and so could you. [Join A.SPIRE.](#)

AS AN A.SPIRE MEMBER, YOU WILL:

BE IN THE ROOM WHERE PRIORITIES ARE SET

- Co-shape the multi-annual and cross-sectoral Strategic Research and Innovation Agenda that orientates European funding towards Process Industry priorities.
- Co-develop the yearly Processes4Planet topics that translate that agenda into concrete funding opportunities.
- Co-lead discussions with the European Commission, ensuring that the reality and needs of the Process Industries are understood and reflected in the industrial innovation policies.

ACT EARLY: FIND THE RIGHT PARTNERS FOR YOUR INDUSTRY-LED INNOVATION

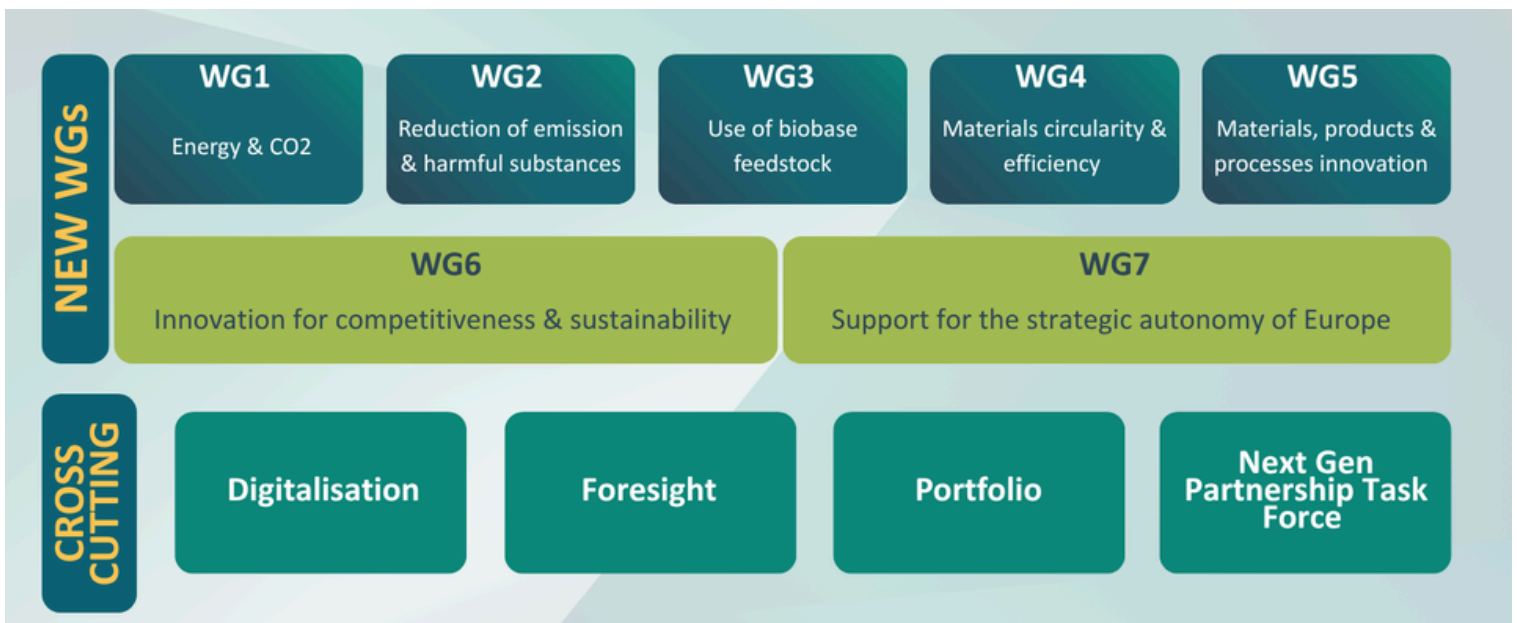

- Increase your success rate by being part of the topics' development.
- Be among the first to have access to the topics' text and prepare your proposals in advance.
- In 2024, 64% of Processes4Planet projects were coordinated by A.SPIRE members.
- Have access to first-hand information and to an extended talent pool through A.SPIRE Members Platform, news, events and activities.
- Find your R&I partners through our brokerage activities, including year-round brokerage support.
- Connect with providers and customers for business opportunities beyond Horizon Europe, through our networking activities.

Join. Collaborate. Shape Tomorrow.

WE WELCOME THREE CATEGORIES OF MEMBERS

- Industry Members: Process Industry companies, associations and clusters
- Research Members: Universities, research institutes, technology centres
- Associate Members: Organisations with an interest in Process Industries

All our members can immediately join our Working Groups. Our industry and research members can also Chair Working Groups and Advisory Groups. In 2026 and 2027, the revamped A.SPIRE Working Groups will develop a new Strategic Research and Innovation Agenda (SRIA) for the future European Partnership led by the Process Industry (2028–2034).

Join A.SPIRE and drive innovation across Process Industries for a competitive, autonomous, and sustainable Europe.
