ReactiveMetalParticles

Providing low cost fine and ultrafine metallic powder to the mass market

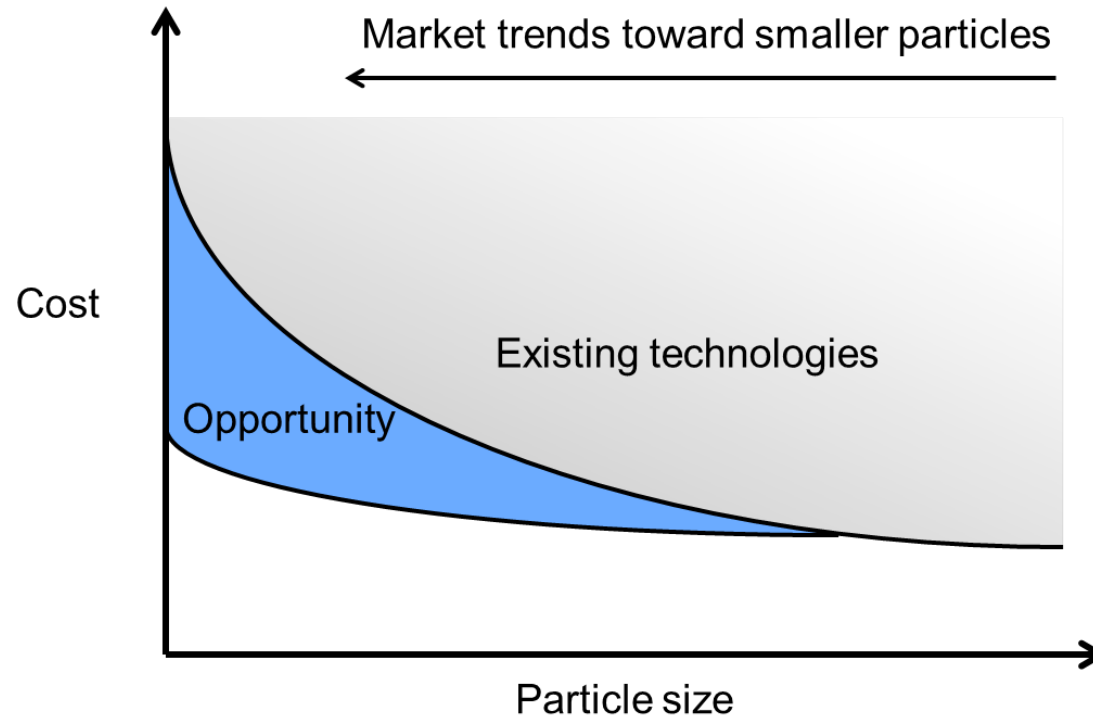

Low micron

Sub micron

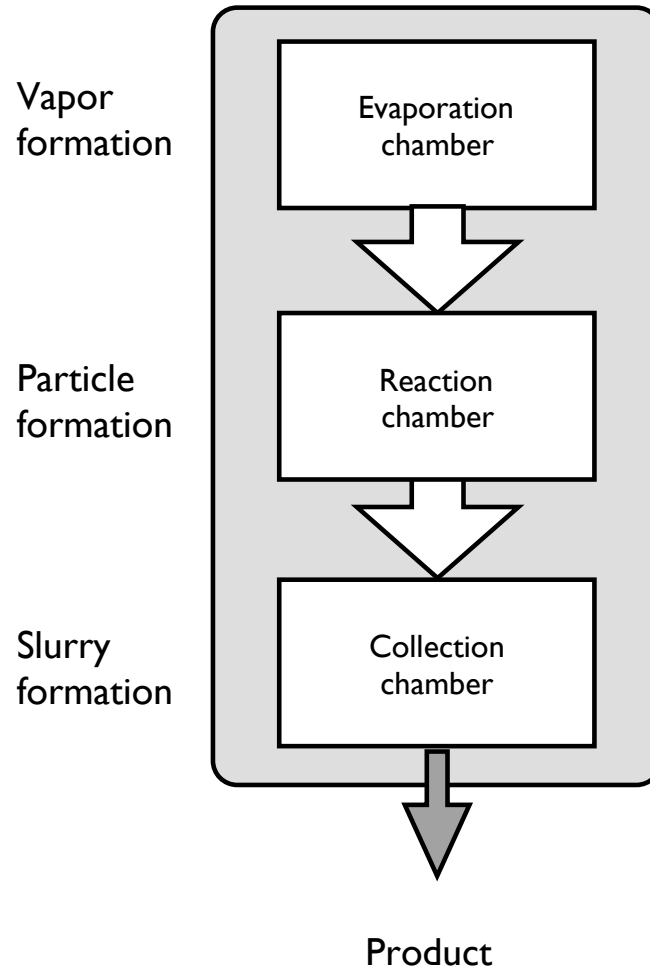

Nano

RMP is an enabler for the miniaturization trend

- *50 % cost reduction compared to conventional sub-micron spherical copper powder*

Well known principles, but new patented reactor design

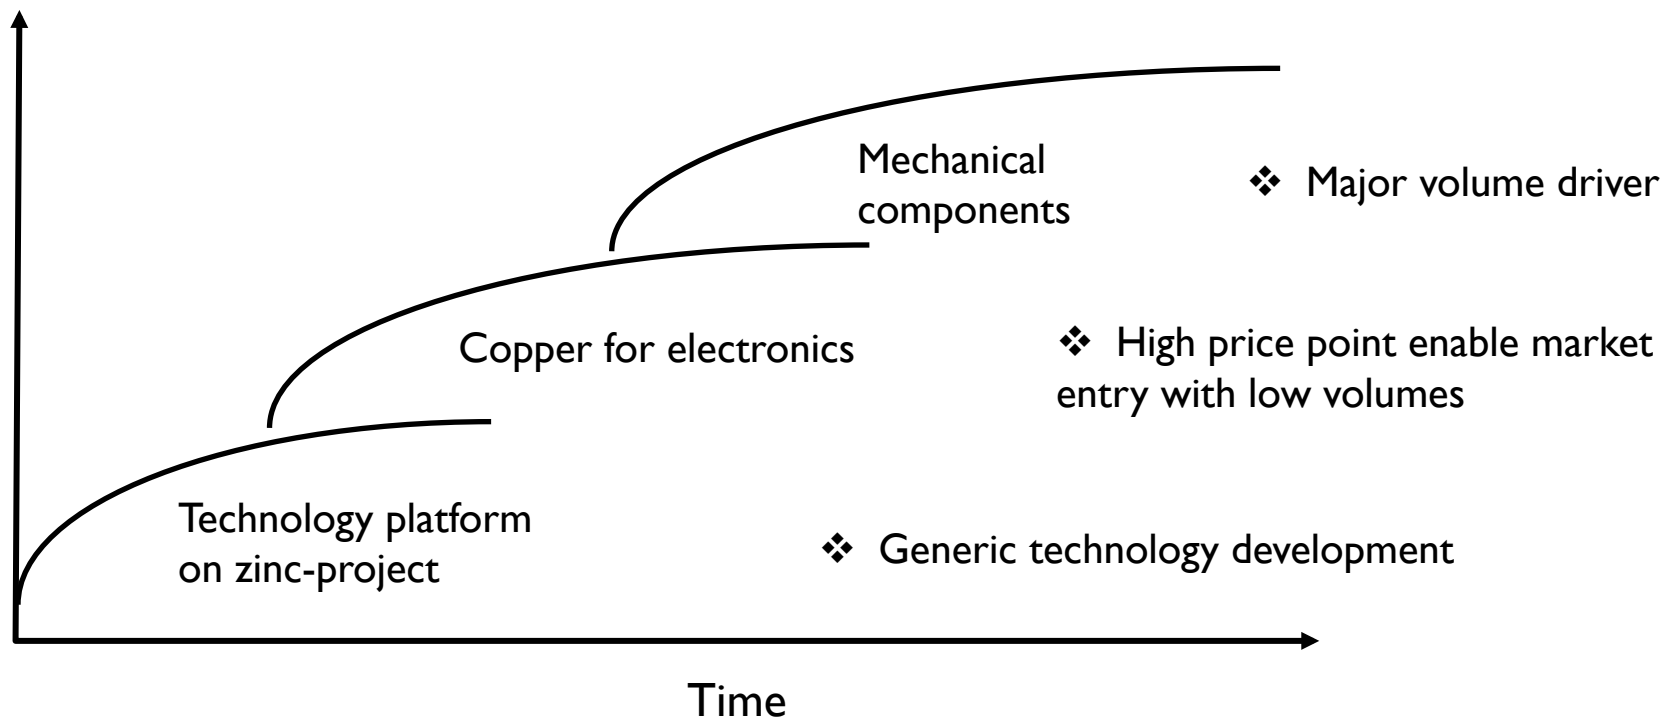

- ✓ High productivity
- ✓ HSE-friendly
- ✓ Modular scale-up
- ✓ Low CAPEX
- ✓ Produced 150kg from test reactor

RMP plan to enter copper powder market in 2017

- *Technology platform can address multiple industries*

Growth horizons

RMP is looking for commercial and technological partners
